# SECTION 1: WHAT IS HAPPENING

## Current State Analysis

Metric	Value
Total Records	10
Total Variables	7
Data Quality	100.0%
Analysis Date	2026-01-29

## Key Performance Metrics:

Metric	Current	Average	Min	Max	Trend
Page Views	2600.00	2100.00	1500.00	2600.00	Increasing
Unique Visitors	2000.00	1605.00	1200.00	2000.00	Increasing
Bounce Rate (%)	35.00	42.70	35.00	50.00	Decreasing
Average Time on Site (min)	5.80	5.17	4.50	5.80	Increasing
New Visitors (%)	65.00	60.00	55.00	65.00	Increasing

# SECTION 2: HOW IT'S HAPPENING

## Pattern & Relationship Analysis

### Trend Analysis:

Metric	Direction	Strength	R²	Growth Rate	Explanation
Page Views	Upward	Strong	0.850	113.94 per period	Page Views is strongly increasing over time with R² = 0.850. This trend is reliable.
Unique Visitors	Upward	Strong	0.827	73.03 per period	Unique Visitors is strongly increasing over time with R² = 0.827. This trend is reliable.
Bounce Rate (%)	Downward	Strong	0.551	-1.10 per period	Bounce Rate (%) is strongly decreasing over time with R² = 0.551. This trend is reliable.
Average Time on Site (min)	Upward	Strong	0.692	0.10 per period	Average Time on Site (min) is strongly increasing over time with R² = 0.692. This trend is reliable.
New Visitors (%)	Upward	Moderate	0.316	0.59 per period	New Visitors (%) is moderately increasing over time with R² = 0.316. This trend is reliable.

### Key Relationships:

Variable 1	Variable 2	Correlation	Type	Explanation
Page Views	Unique Visitors	0.983	Positive	When Page Views goes up, Unique Visitors typically increases. This strong positive relationship (r=0.983) indicates that as page views increase, unique visitors also tend to increase.
Page Views	Bounce Rate (%)	-0.876	Negative	When Page Views goes up, Bounce Rate (%) typically decreases. This strong negative relationship (r=-0.876) indicates that as page views increase, the bounce rate tends to decrease.
Page Views	Average Time on Site (min)	0.943	Positive	When Page Views goes up, Average Time on Site (min) typically increases. This strong positive relationship (r=0.943) indicates that as page views increase, the average time spent on the site also tends to increase.
Page Views	New Visitors (%)	0.613	Positive	When Page Views goes up, New Visitors (%) typically increases. This moderate positive relationship (r=0.613) indicates that as page views increase, the percentage of new visitors also tends to increase.
Page Views	Returning Visitors (%)	-0.613	Negative	When Page Views goes up, Returning Visitors (%) typically decreases. This moderate negative relationship (r=-0.613) indicates that as page views increase, the percentage of returning visitors tends to decrease.
Unique Visitors	Bounce Rate (%)	-0.918	Negative	When Unique Visitors goes up, Bounce Rate (%) typically decreases. This strong negative relationship (r=-0.918) indicates that as unique visitors increase, the bounce rate tends to decrease.
Unique Visitors	Average Time on Site (min)	0.969	Positive	When Unique Visitors goes up, Average Time on Site (min) typically increases. This strong positive relationship (r=0.969) indicates that as unique visitors increase, the average time spent on the site also tends to increase.
Unique Visitors	New Visitors (%)	0.636	Positive	When Unique Visitors goes up, New Visitors (%) typically increases. This moderate positive relationship (r=0.636) indicates that as unique visitors increase, the percentage of new visitors also tends to increase.
Unique Visitors	Returning Visitors (%)	-0.636	Negative	When Unique Visitors goes up, Returning Visitors (%) typically decreases. This moderate negative relationship (r=-0.636) indicates that as unique visitors increase, the percentage of returning visitors tends to decrease.
Bounce Rate (%)	Average Time on Site (min)	-0.970	Negative	When Bounce Rate (%) goes up, Average Time on Site (min) typically decreases. This strong negative relationship (r=-0.970) indicates that as the bounce rate increases, the average time spent on the site tends to decrease.
Bounce Rate (%)	New Visitors (%)	-0.754	Negative	When Bounce Rate (%) goes up, New Visitors (%) typically decreases. This strong negative relationship (r=-0.754) indicates that as the bounce rate increases, the percentage of new visitors tends to decrease.
Bounce Rate (%)	Returning Visitors (%)	0.754	Positive	When Bounce Rate (%) goes up, Returning Visitors (%) typically increases. This strong positive relationship (r=0.754) indicates that as the bounce rate increases, the percentage of returning visitors tends to increase.
Average Time on Site (min)	New Visitors (%)	0.651	Positive	When Average Time on Site (min) goes up, New Visitors (%) typically increases. This moderate positive relationship (r=0.651) indicates that as the average time spent on the site increases, the percentage of new visitors also tends to increase.
Average Time on Site (min)	Returning Visitors (%)	-0.651	Negative	When Average Time on Site (min) goes up, Returning Visitors (%) typically decreases. This moderate negative relationship (r=-0.651) indicates that as the average time spent on the site increases, the percentage of returning visitors tends to decrease.
New Visitors (%)	Returning Visitors (%)	-1.000	Negative	When New Visitors (%) goes up, Returning Visitors (%) typically decreases. This strong negative relationship (r=-1.000) indicates that as the percentage of new visitors increases, the percentage of returning visitors tends to decrease.

## ■ SECTION 3: WHAT WILL HAPPEN

*Predictive Forecasting & Future Outlook*

# STRATEGIC RECOMMENDATIONS

Priority	Category	Recommendation	Action Plan	Expected Outcome
High	Growth	Capitalize on Page Views growth trend	Page Views shows strong upward momentum. Increase investment in content and SEO.	Continued growth at 113.94 per period
High	Growth	Capitalize on Unique Visitors growth trend	Unique Visitors shows strong upward momentum. Increase investment in marketing and outreach.	Continued growth at 73.03 per period
High	Risk Mitigation	Address declining Bounce Rate (%)	Bounce Rate (%) shows strong downward trend. Investigate reasons for decline.	Stabilize and reverse decline
High	Growth	Capitalize on Average Time on Site (min) growth trend	Average Time on Site (min) shows strong upward momentum. Invest in user experience.	Continued growth at 0.10 per period
High	Growth	Capitalize on New Visitors (%) growth trend	New Visitors (%) shows moderate upward momentum. Increase investment in acquisition.	Continued growth at 0.59 per period
Medium	Strategic Insight	Leverage Page Views-Unique Visitors relationship	These metrics show strong positive correlation. Use Page Views to predict Unique Visitors.	Better forecasting and decision making
Medium	Strategic Insight	Leverage Page Views-Bounce Rate (%) relationship	These metrics show strong negative correlation. Use Page Views to predict Bounce Rate.	Better forecasting and decision making
